

## The Dark Side of AI: Unveiling Ethical Dilemmas

**Dr. Fatou Sankare**  
Marymount University, USA

In this thought-provoking talk, I will embark on a journey into the intricate web of ethical dilemmas and the dark side of artificial intelligence (AI). As I marvel at the advancements and capabilities of AI, it becomes imperative to scrutinize the shadows it casts on our ethical landscape. From biased algorithms perpetuating societal inequalities to the looming threat of job displacement, I navigate through the multifaceted challenges that arise from the relentless progress of AI.

Delving into real-world scenarios and case studies, I confront the ethical conundrums that emerge when machines make decisions that impact human lives. As I peel back the layers, I explore the nuanced issues of privacy invasion, algorithmic bias, and the potential misuse of powerful AI technologies. This exploration compels us to question not only the capabilities of AI but also the responsibility that comes with wielding such technological prowess.

Ultimately, this talk serves as a call to action, urging us to critically examine the path we tread in the realm of AI development. By shedding light on the ethical complexities and potential pitfalls, I aim to foster a deeper understanding of the delicate balance between technological innovation and ethical responsibility.

### Biography:

Dr. Fatou Sankare, a Bronx, NY native with roots from The Gambia, graduated with a Bachelor of Arts in Political Science with a minor in Arabic from Howard University and continued her education at Fordham University, where she received her Master of Science in Cybersecurity.

Fatou Sankare received her Doctorate of Science in Cybersecurity at Marymount University. Her research area of focus is on privacy with an emphasis on policy and data in cybersecurity.

Fatou's work experience is mainly within the federal government and in academia. Currently, Fatou currently works as a Cyber Engineer. She is also a professor at Marymount University and Capitol Technology University. Fatou was previously a visiting professor in Computer Information Systems at West Virginia University - Potomac State College.

Fatou is also the founder of Datacation LLC — with a mission to increase cyber education particularly in marginalized communities. Fatou is a Certified Ethical Hacker and currently holds the AWS Machine Learning Specialty Certification.
